2024

*Bulls For Sale*

BY PRIVATE TREATY

WITH SPECIAL GUEST BREEDERS

HAWKINS CATTLE

Seth, Kali & Shay Flower

Shane & Madisen  
Flower

Ben, Julianne,  
Weston  
Caden &  
Logan Hawkins

Thank you for spending time to look through this years offering of private treaty bulls. We are constantly working and thinking of ways to improve the product we offer. In 2023 we've invested in genetics, facilities, and nutrition to be able to offer better cattle to our customers. Your success is the key to our success.

**Genetics-** We invested into some really strong herd sires & most recently a new donor cow. CDI Top Impact, our senior herd sire looks incredible, but the rest of our herd bull power is fairly young consisting of just a couple coming 2 year olds, and coming 3 year olds. We like what we see so far, but are looking forward to their impact down the road.

**Facilities-** This summer Seth & Shane put in many hours re-imagining our pen set-up. In typical fashion one Friday afternoon Seth started ripping out fence. We re-did all of the pens on the North side of our operation, poured 200 feet of concrete for the cattle, and added a handful of waterers. There were countless hours put into the project but it has vastly improved efficiencies, pen utilization, and better feeding conditions for the cows.

**Nutrition-** We started working with Jadon Buntjer from Hubbard Feeds about a year ago to help us with rations and nutrition for the entire herd. Around that same time we implemented utilization of Performance Beef. This has been a game changer for us. We can now better track inputs, feed intake, and make sure the cows & bulls we are developing have everything they need to be successful for you.

As the bulls have developed, we are pleased with how they have come together. Their phenotype is strong and their genetic profiles add to their quality. A big part of that was our acquisition of KBHR Gunsmoke in the spring of 2022, which we highlight later in the catalog. Shay has worked hard all fall, and you will notice the bulls' extreme docility. She spends countless hours feeding & analyzing them through the fenceline feeder.

We invite you to join us on January 20th, 2024 for the official "opening" of our sale pen. Bulls will sell private treaty, first come first serve, with the pen opening at 10 A.M. that morning. You can pick bulls either in person or over the phone with Seth, Ben, Shane, or Kali. If you have any questions please feel free to contact us prior to. We will have food & refreshments all day, come by, check out the cattle, and grab a taco! We are looking forward to seeing you there! If it is past January 20th, please give either Seth or Ben a call to set up an appointment to view the cattle.

We cannot say thank you enough for looking through the bulls. Thank you to all of our previous customers who continue to come back, and all of the new ones we look forward to meeting. If you have any questions please don't hesitate to reach out!

*Sincerely,*  
Seth & Kali Flower

HAWKINS CATTLE

**ALL ANIMALS SELL PRIVATE TREATY  
FIRST COME FIRST SERVE  
PRIVATE TREATY BULL SHOWCASE  
JANUARY 20TH, 2024 - PEN OPENS AT 10 AM**

Your bull selections can be made in person or over the phone starting at 10 AM the morning of January 20th.

**Location:**

350 HWY 29 SW  
Benson, MN 56215

**Contacts:**

Seth Flower.....320-815-8219  
Ben Hawkins.....701-866-4402  
Kali Flower.....218-684-4898  
Shane Flower.....320-314-2079

**Housing:**

We will house bulls free of charge until April 15th, 2023. Prior to delivery or pickup, bulls will have passed a breeding soundness exam.

**Terms:**

Terms of sale are cash or check. Payable immediately once an agreement is made between buyer & seller. As soon as animal is sold it becomes the property of the buyer. We strongly encourage insurance on your purchases if you plan to leave them in our care until April 15th. **We are retaining 1/3 semen interest and selling 100% possession on all bulls selling unless other terms are stated.**

**Videos:**

Videos will be available at [www.cottonwoodcattleccsk.com](http://www.cottonwoodcattleccsk.com).

**Bull Vaccination**

Bulls were weaned early September. At weaning they received CattleMaster Gold FP 5 L5, Vision 7 Somnus, and One Shot. Bulls were poured with Clean-Up II on January 10th. See nutrition information in the back of the catalog

**Consulting Veterinarian**

# Reference Sire

## KBHR GUNSMOKE J131

**PB SM - Homozygous Black - Homozygous Polled**

**API: 194.0 - TI: 108.0**

In the spring of 2022 we purchased KBHR Gunsmoke J131 at the Keller Broken Heart Ranch annual bull sale, along with Clear Springs Cattle Company & Cow Camp Ranch. We felt as though he was a bull that would genetically advance our cows without sacrificing structure or hoof quality. The calves have been everything we hoped for! We used him heavily on our females, and as a result you will find 6 half brothers. The Gunsmoke calves have been consistent, sound, and functional. These are the types of bulls we feel will be well accepted into the beef industry. The females in the replacement pen also look top notch. We are looking forward to have you see them in person!

*Semen available through Allied Genetics Resources*

# Cow Herd & Bull Development

Jadon Buntjer- Nutritionist with Hubbard Feeds

## **Overview:**

Welcome to the Cottonwood Cattle & Hawkins Cattle 2024 open house & Private Treaty Bull Showcase! I think the Flowers' have brought you an excellent offering of bulls that will be sure to perform for you for many years to come. My goal with the nutrition program for Cottonwood Cattle is to complement and express the genetic potential of the cattle that have been rigorously selected for longevity and performance. We want these cattle to reach their full reproductive potential while maintaining structural soundness.

## **Nutrition Program:**

The nutrition starts with the cows. The potential of that calf can be greatly affected by the nutrition the cow receives before and during her pregnancy. It is important to have a complete mineral program that unlocks the full effects of fetal programming, helping that calf develop to have its best chance at future productivity.

The bulls are developed on a high roughage, moderate energy, high protein ration- consisting of primarily corn silage and hay. Optimal vitamin and trace mineral supplementation is achieved through the use of BluePrint mineral fed through the TMR. We are confident these animals will perform for you and prove their value.
